(1)RealAVM™ is a CoreLogic® derived value and should not be used in lieu of an appraisal.

(2)The Confidence Score is a measure of the extent to which sales data, property information, and comparable sales support the property valuation analysis process. The confidence score range is 50 - 100. Clear and consistent quality and quantity of data drive higher confidence scores while lower confidence scores indicate diversity in data, lower quality and quantity of data, and/or limited similarity of the subject property to comparable sales.

(3)The FSD denotes confidence in an AVM estimate and uses a consistent scale and meaning to generate a standardized confidence metric. The FSD is a statistic that measures the likely range or dispersion an AVM estimate will fall within, based on the consistency of the information available to the AVM at the time of estimation. The FSD can be used to create confidence that the true value has a statistical degree of certainty.

Forecast Standard Deviation (FSD): 0.21 | Cap Rate: 3.5%

The Sell Score indicates the relative likelihood a property will be listed for sale in the next 6 months.

Properties with a Very High Sell Score (831+) represent the top 5% of properties most likely to sell and are 2.6 times more likely to sell than the average property.

Properties with a Moderate to High Sell Score (502-830) are more likely to sell than the average property.

Properties with a Very Low to Low Sell Score (0-501) are less likely to sell than the average property.

(1) Rental Trends is a Cotality™ derived value and should be used for informational purposes only. Rental Trends is not intended to provide recommendations regarding rental prices, lease renewal terms, or occupancy levels to landlords.

(2) The FSD denotes confidence in a Rental Trends estimate and uses a consistent scale and meaning to generate a standardized confidence metric. The FSD is a statistic that measures the likely range or dispersion a Rental Trends estimate will fall within, based on the consistency of the information available at the time of estimation. The FSD can be used to create confidence that the displayed value has a statistical degree of certainty.
